## TABLE OF APPENDICES

- Site Maps
- Photographs
- Sanborn Maps
- City Directories
- Aerial Photographs
- Municipal Information
- Regulatory Information
- Hydrologic/Hydrogeologic Information
- Personnel Qualifications

## 1.0 EXECUTIVE SUMMARY

Lender Consulting Services, Inc. (LCS) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope and limitations of ASTM Standard Practice E1527-21, as a portion of the User's requirements in the All Appropriate Inquiries process. The following report details the Environmental Professional's findings in all appropriate inquiries of the subject property in accordance with ASTM E1527-21.<sup>1</sup>

This report was prepared at the request of Mission Hills Development Corp. for the property discussed below (hereinafter referred to as "subject property"). A [Site Map](#) is appended hereto. Any exceptions to, or deletions from, this practice are described in this report.

Subject Property Details	
Subject Property Name	Agricultural Land
Subject Property Address	Portion of 4825 Big Tree Road, Hamburg, Erie County, New York
Parcel No(s).	Portion of 160.20-2-2.1
Acreage (approximate)	35.3 of greater 41.01 acre parcel
Description of Development	<p>Hay field; no structures noted on-site. Also includes some grassy areas and trees.</p> <p>Of note, the northern portion of the subject parcel includes residential/farmstead buildings. That portion of the subject property is being subdivided and is not part of the current collateral.</p>

The history of the subject property is summarized as follows:

Date Range	Apparent Use	Source
At least 1926 through present	Agricultural land	Aerial photographs, city directories, topographic map, municipal records, site contact, and site reconnaissance

### 1.1 Findings and Opinions

This assessment has identified no evidence of recognized environmental conditions (RECs) in connection with the subject property.

This assessment has identified no evidence of controlled recognized environmental conditions (CRECs) in connection with the subject property.

This assessment has identified no evidence of historical recognized environmental conditions (HRECs) in connection with the subject property.

This assessment has identified no evidence of de minimis conditions in connection with the subject property.

---

1. This Executive Summary details the specific findings of LCS' assessment and is provided for convenience to the reader. The reader is encouraged to read the entire report.

## 1.2 Recommendations

LCS does not recommend further investigation at this time; however, the following should be noted:

- The subject property has been utilized as agricultural land since at least 1926. Herbicides and pesticides may have been utilized on-site in connection with such use. While LCS does not consider such to be a significant concern, as future planned development includes residences, it should be confirmed that any soil testing required for converting agricultural land to residential housing is completed prior to the planned residential development activities. Any impacted soil should be properly addressed; costs for such should be included in any project budgets.

## 1.3 Conclusion

LCS has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 for Portion of 4825 Big Tree Road, Hamburg, New York, the subject property. Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property, other than identified in Section 1.1 above.

We appreciate the opportunity to be of service to you and look forward to servicing your environmental needs in the future. **Should you have any questions relative to this report, please contact the LCS project manager associated with this project, Ian McCurdy at [imccurdy@lenderconsulting.com](mailto:imccurdy@lenderconsulting.com) or 717-205-6800.** We will make ourselves available at your convenience.

This report constitutes the findings and recommendations of LCS' investigation conducted for the subject property as written and reviewed by the following personnel:

Julia Torres  
Environmental Analyst

Heather Lamb  
Vice President, Environmental Services

## 1.4 Data Gap Summary

According to ASTM Standard Practice E1527-21, data gaps are only significant if other information and/or professional experience raise reasonable concerns involving the data gap. The following is a discussion of data gaps encountered through the completion of this Phase I ESA. Refer to [Section 10.0](#) for standard limitations.

Type of Data Gap	Details of Data Gap	Sources Consulted	Significance
Site Reconnaissance - physical limitations to LCS' observations	Observations were limited due to vegetative cover.	Not applicable	Not anticipated to be significant, based on information reviewed to date.
Historical Use	Historical uses for each five year period were not obtained.	Aerial photographs, Sanborn maps, city directories, topographic map, municipal records, site contact, and site reconnaissance	While data for each year was not obtained, the data did provide relatively complete records of site uses.
Regulatory Review	Complete responses from regulatory agencies have not been received.	State and/or local regulators	Unknown; however, not anticipated to be significant based on information reviewed to date.
Interviews	LCS was not able to identify and/or contact historic owners and/or occupants.  A completed LCS Owner/Operator Questionnaire was not returned to LCS.	Current owners and municipal records for historic ownership information.	Unknown; however, not anticipated to be significant based on information reviewed to date.

## 1.5 Reliance and Declaration

LCS authorizes the Client(s) named on the cover of this report to use this report to determine their interest in the subject property.

I declare that, to the best of my professional knowledge and belief, I meet the definition of an Environmental Professional as defined in 40 CFR 312.10. [Refer to [Personnel Qualifications](#).]

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Heather Lamb  
Environmental Professional

## 2.0 PURPOSE

The purpose of the *Phase I Environmental Site Assessment Report* is to:

1. Provide an objective third-party opinion as to the environmental status or condition of the subject property.
2. Identify the following:
  - a. **Recognized environmental conditions:** The presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.
  - b. **Controlled recognized environmental conditions:** A *recognized environmental condition* affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, activity and use limitations or other property use limitations).
  - c. **Historical recognized environmental conditions:** A previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).
  - d. **De minimis conditions:** A condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.
  - e. **Business environmental risks:** A risk that can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of the commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. Consideration of BER issues may involve addressing one or more non-scope considerations.
3. Recommend any additional testing or investigation warranted by the findings of the Phase I; (vii) gather preliminary information regarding the compliance of the subject property with applicable environmental laws, regulations and permits.
4. Permit a User [as defined by "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" (ASTM E 1527-21)] to satisfy "all appropriate inquiry" as defined at 42 U.S.C. §9601(35)(B). LCS assumes the User to be the Client(s) named on the cover of this report.

This practice is intended to permit a User to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability subject to all appropriate inquiries into the previous ownership and uses of the property consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35)(B). Controlled substances are not included within the scope of this standard. Persons conducting an environmental site assessment as part of an EPA Brownfields Assessment and Characterization Grant awarded under CERCLA 42 U.S.C. §9604(k)(2)(B) must include controlled substances as defined in the Controlled Substances Act (21 U.S.C. §802) within the scope of the assessment investigations to the extent directed in the terms and conditions of the specific grant or cooperative agreement.

This practice does not address whether requirements in addition to all appropriate inquiries have been met in order to qualify for the LLPs, including the continuing obligation not to impede the integrity and effectiveness of activity and use limitations (AULs), or the duty to take reasonable steps to prevent releases, or the duty to comply with legally required release reporting obligations). Refer to Section 10.0.

### **3.0 SCOPE OF WORK**

This Phase I Environmental Assessment report has been prepared in accordance with "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process," ASTM E 1527-21. This standard was devised to address the site assessment portion for *Innocent Landowners, Standards for Conducting All Appropriate Inquiries* (40 CFR 312). The scope of work is intended to identify conditions indicative of releases or threatened releases of hazardous substances or petroleum products in, on, or at the subject property, via the following tasks:

- A) A review of information provided by the person seeking liability protection related to environmental cleanup liens; specialized knowledge or experience regarding the subject property; the relationship of the purchase price to the fair market value of the property, if the property were not contaminated; and, commonly known or reasonably available information about the subject property.
- B) Interviews with past and present owners, operators, and occupants.
- C) A review of historical sources of information documenting the subject property's first use.
- D) A review of federal, state, tribal, and local government records, as defined in 40 CFR 312.26.
- E) A visual inspection of the subject property and adjacent properties (to the extent possible).
- F) Preparation of this written report on all appropriate inquiries.

## 4.0 PROPERTY AND VICINITY DESCRIPTION

### 4.1 Site Reconnaissance

A site inspection was conducted on October 12, 2023 by Alan Schenk, Senior Project Manager for LCS to document subject property conditions and to identify RECs. This inspection included a walkthrough of all accessible units/spaces on the subject property, including interior and exterior areas. Access to the subject property and identification of subject property boundaries was provided by Gary Hartloff, property owner, associated with the subject property for 60 years.

LCS' observations are summarized below. Photographs of the subject property were taken by LCS with the objective of documenting the physical condition of the subject property and any improvements. These photographs are appended in [Photographs](#). Refer to Section 1.2 for limitations encountered during the site reconnaissance.

Subject Property Details	
Subject Property Name	Agricultural Land
Subject Property Address	Portion of 4825 Big Tree Road, Hamburg, Erie County, New York
Parcel No(s).	Portion of 160.20-2-2.1
Acreage (approximate)	35.3 of greater 41.01 acre parcel
Description of Development	Hay field; no structures noted on-site. Also includes some grassy areas and trees.  Of note, the northern portion of the subject parcel includes residential/farmstead buildings. That portion of the subject property is being subdivided and is not part of the current collateral.

Additional Subject Property Details	
Fronting Street(s)	Big Tree Road and Parker Road
Elevation (feet above mean sea level)	~716-733
Topography	Level at grade
Nearest Water Body (Name/Distance)	Rush Creek/0.45 miles southwest
Utilities Provided	No currently connected; all public available
Wastes Generated	None

#### 4.1.1 Storage Tanks

There was no evidence of USTs or ASTs for the containment of petroleum products (such as fill ports, vent pipes, accessways, etc.) on the subject property.

#### 4.1.2 Hazardous and/or Regulated Materials

No hazardous and/or regulated materials were noted stored or used on the subject property. In addition, no unidentified substance containers (unlabeled drums, etc.) were noted.

#### 4.1.3 Solid, Hazardous, and/or Regulated Wastes

No solid, hazardous, or regulated wastes were noted stored or generated on-site.

#### **4.1.4 Staining or Corrosion, Pools of Liquid, Odors, and/or Stressed Vegetation**

No evidence of spills/pools of liquid, staining, corrosion, strong odors, or other indications that a surficial release has occurred was identified. In addition, stressed vegetation was not evident on-site.

#### **4.1.5 Fill/Dirt and/or Land Disposal**

There was no evidence of fill dirt or land disposal activities currently or previously conducted on the subject property.

#### **4.1.6 Wastewater**

No domestic wastewater is currently generated on-site.

No evidence of a current or former septic system or cesspool was identified.

#### **4.1.7 Drains and Sumps**

No storm drains were identified.

#### **4.1.8 Potable Water Supply/Wells**

No evidence of current or former potable wells, monitoring wells, irrigation wells, dry wells, or injection wells was identified.

#### **4.1.9 Pits, Ponds, and Lagoons**

There was no evidence of pits, ponds, or lagoons used in connection with waste treatment or waste disposal.

#### **4.1.10 Air Emissions**

There were no process exhaust systems on the subject property.

#### **4.1.11 Suspect PCBs**

No suspect PCB sources were identified on the subject property.

#### **4.1.12 Other Issues**

There was no evidence of any other environmental concerns associated with the subject property.

#### 4.1.13 Adjacent Property Use

The adjacent properties were visually inspected from the subject property boundaries and the observations are discussed below. Adjacent historical operations and uses are discussed in [Section 5.0](#).

Direction from Subject Property	Current Use	Potential Historical Use	Concerns
North	Residential (remaining portion of 4825 Big Tree Road)	Same	None
South	Residential (4726-4762 John Michael Way)	Same	None
East	Residential (4331-4470 Parker Road and 4875 and 4876 Marilyn Drive) and playground (4899 Big Tree Road)	Same	None
West	Wooded land	Same	None

#### 4.2 Summary of Observations; Potential Concerns

No conditions indicative of releases or threatened releases of hazardous substances or petroleum products were identified during LCS' site reconnaissance.

## 5.0 HISTORICAL OPERATIONS AND USES

The historical operations and uses of the subject property and adjacent properties have been researched through a review of reasonably obtainable information. Based on information obtained and reviewed by LCS, the following was noted with respect to on-site and adjacent historical development, operations, and/or tenants. Recognized environmental conditions identified with respect to adjacent properties, if any, are discussed below.

### 5.1 Sanborn Maps

#### Appended: [Sanborn Maps](#)

EDR forwarded a letter to LCS indicating that there is no Sanborn map coverage for the subject property (included in Appendix).

### 5.2 City Directories

#### Appended: [City Directories](#)

Year(s)	Findings
1940, 1968, 1970	Address not listed
1976, 1981, 1985, 1992	Residential (presumably related to buildings on the northern portion of the parcel that will be subdivided)
1995	Address not listed
2000, 2005, 2010, 2014, 2017, 2020	Residential (presumably related to buildings on the northern portion of the parcel that will be subdivided)

No adjacent sites of obvious environmental concern were identified.

### 5.3 Aerial Photographs

#### Appended: [Aerial Photographs](#)

1926	
Subject Property	Findings
North	Residential and agricultural land
South	Agricultural land
East	Agricultural land
West	Agricultural and wooded land

1959, 1966, 1974, 1985	
Subject Property	Findings
North	Residential
South	Agricultural land
East	Residential and agricultural land
West	Agricultural/fallow and wooded land

1995, 2008, 2013, 2019	
Subject Property	Findings
North	Residential
South	Agricultural land in 1995; residential since 2008
East	Residential

West	Wooded land
------	-------------

#### 5.4 Topographic Maps

Appended: [Site Maps](#)

Year(s)	Findings
1965	No structures, tanks, wells, or pipelines were identified on-site.

#### 5.5 Municipal Information

Appended: [Municipal Information](#)

Subject Property Details	Findings
Parcel No(s).	Portion of 160.20-2-2.1
Size (acres)	35.3 of greater 41.01 acre parcel
Current Owner	Gary Hartloff
Past Owners	Arthur Wojcik
Square Footage of Buildings/Date of Construction	Development is all presumably for the northern portion of the parcel, which is being subdivided. Development includes a 1,950 square foot residence built in 1825, garage built in 1945, and barn built in 1991
Utilities Provided	All public

There was no indication of historical heating systems or previous site development.

The Abstract of Title Search for the subject property was not available for review.

#### 5.6 Site Contact Interview

According to Gary Hartloff, the subject property has always been used for agricultural use.

#### 5.7 Other Research

No additional historical information was obtained from local or online sources.

#### 5.8 Previous Studies

No previous studies were provided to LCS for review.

#### 5.9 Summary of Historical Uses

Date Range	Apparent Use	Source
At least 1926 through present	Agricultural land	Aerial photographs, city directories, topographic map, municipal records, site contact, and site reconnaissance

No conditions indicative of releases or threatened releases of hazardous substances or petroleum products were identified based on LCS' historical research.

## **6.0 PHYSICAL AND HYDROGEOLOGIC SETTING**

The subject property is included on the Buffalo SE, NY Quadrangle Topographic Map dated 1965. Regional groundwater appears to flow in a westerly direction, based on a review of this map.

Geologic mapping of the area reveals the underlying bedrock as belonging to the West Falls Group- Angola and Rhinestreet Shales, characterized by till.

The subject property is situated regionally in the Lake Erie- Niagara River Major Drainage Basin and locally within the Lake Erie- Direct Drainage Sub-Basin.

Open water bodies or surficial water bodies are not located on the subject property. Surface drainage appears to flow in a direction toward the lowest elevated points on the subject property and/or toward the closest storm drains on the subject property. Localized groundwater flow is influenced by utilities, subsurface structures, etc. A site-specific hydrogeologic study would be required to confirm the specific groundwater flow direction.

## 7.0 REGULATORY AND USER PROVIDED INFORMATION

Federal and state environmental regulatory information was provided by EDR, a commercial government record search company. While ASTM-defined radii were used where appropriate, the radii may have been modified due to the size of the subject property or the nature of the area, as permitted under the ASTM standard. Databases not required by the ASTM standard were searched to radii based on LCS' experience. A complete list of the databases reviewed is included within the EDR report, appended in [Regulatory Information](#). Additional regulatory information was obtained through interviews with local municipalities and/or other knowledgeable persons, FOIA requests, and user-supplied information.

In some cases, location information supplied by the regulatory agencies is insufficient to allow the database company (EDR) to geocode facility locations. These facilities are listed under the orphan/unmappables section within the database report. Any "unplottable" sites identified by the EDR report were also reviewed to the extent practical, based on site name and address, to assess whether they are also present within their appropriate radii. Based on this review, any unmappables identified in the regulatory database are discussed below in the appropriate sections.

This information was reviewed in an effort to evaluate the potential for contaminant migration on the subject property or onto the subject property. [Migration is defined in ASTM E1527-21 as "the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface."] Specifically, the evaluation included a review of regulatory records, hydrologic information, distance to the subject property, and geologic information.

The following environmental records sources were reviewed:

Source	Date(s)	Comment
EDR	Dates for the databases are provided within the regulatory database.	Refer to <a href="#">Section 7.1</a>
Town of Hamburg, Town of Hamburg Fire Department, and Town of Hamburg Health Department FOIL requests	October 5, 2023	Refer to <a href="#">Section 7.7.1</a>
NYSDEC FOIL request	October 5, 2023	Refer to <a href="#">Section 7.7.2</a>

### 7.1 Subject Property

The subject property was not identified in the EDR report.

### 7.2 Adjacent Properties

Adjacent properties were not identified within the EDR report.

Of note, while EDR plots a SWF site east adjacent, it appears to be misplotted. There is no evidence that a SWF has been located in that location.

### 7.3 Other Listings

No additional listings identified in the EDR report are considered a potential environmental concern due to the distance to the subject property, the status of the listed sites, and/or the lack of reasonably ascertainable or practically reviewable records indicating a significant release at the listed facilities.

## **7.4 Vapor Intrusion Screening**

LCS' site observations and review of the regulatory records and historical data did not identify conditions on the subject property or adjacent properties that would indicate a REC relative to vapor intrusion in connection with the subject property.

This vapor intrusion screening was conducted in accordance with ASTM E1527-21 and is not intended to satisfy the requirements of ASTM E2600-22. The scope of this screening was limited to visual observations and a review of the EDR report and did not include the collection and laboratory analysis of air samples to confirm the presence of airborne contaminants by vapor intrusion.

## **7.5 Regulatory Agency File and Record Review**

All regulatory listings for the subject property and adjacent property(s) were evaluated in order to determine the need for a regulatory file review. The purpose of a regulatory file review is to obtain additional information about the listings and determine whether RECs, CRECs, or *de minimis* conditions (including HRECs) exist on the subject property due to the listings.

Based on this evaluation, the following was concluded:

- As the subject and adjacent properties were not identified in the regulatory database, no file/record review is warranted.

## **7.6 Enforcement Actions, Permitted Activities, and Institutional Controls**

No records were identified indicating that enforcement actions, orders, or institutional controls have been imposed against the subject property.

The subject property is not subject to any current or historical environmental permit activities.

## **7.7 Interviews and User Provided Information**

### **7.7.1 Local Regulators**

FOIL requests were submitted to the Town of Hamburg, Town of Hamburg Fire Department, and Town of Hamburg Health Department on October 5, 2023. As of the date of this report, LCS has not received a response.

### **7.7.2 State Regulators**

To augment the information provided by the EDR database, a request for information was forwarded to the NYSDEC for information concerning the subject property. To date, a complete response has not been received from this agency.

### **7.7.3 User**

LCS was informed that the User maintains no specialized knowledge of environmental concerns with respect to the subject property. As such, the User could not provide useful answers to the ASTM 1527-21 Phase I Environmental Site Assessment User Questionnaire. [As required under 40 CFR 312, only those seeking liability protection under CERCLA must provide the Environmental Professional with certain information and documentation.]

#### **7.7.4 Current Owner/Operators**

The *LCS Owner/Operator Questionnaire* was forwarded to Gary Hartloff on October 12, 2023. As of the date of this report, LCS has yet to receive the completed Questionnaire. Any response information that would alter or affect the findings and conclusions of this report will be forwarded as an addendum to this report when it is received by LCS.

#### **7.7.5 Former Owner/Operators**

As required by 40 CFR 312.23, LCS has attempted to contact and interview former owners and/or operators of the subject property to discuss the historical use and storage of hazardous substances. LCS has been unable to interview any relevant previous owners or operators.

### **7.8 Summary of Regulatory and User Provided Information**

No conditions indicative of releases or threatened releases of hazardous substances or petroleum products were identified based on the review of regulatory and User provided information.

## **8.0 ASTM NON-SCOPE CONSIDERATIONS**

### **8.1 Asbestos-Containing Materials**

As there are no structures currently on-site, ACMs are not a concern.

### **8.2 Lead-Based Paint**

As there are no structures currently on-site, LBP is not a concern.

### **8.3 Mold**

As there are no structures currently on-site, mold is not a concern.

### **8.4 Radon**

Radon is a radioactive gas that occurs naturally from the breakdown of uranium in rock. Radon can be found in high concentrations in soils and rock containing uranium, shale, granite, phosphate and pitchblende. Radon may also be found in soils contaminated with certain types of industrial wastes such as the byproducts from uranium or phosphate mining. Radon gas can move through small fractures in soil and rock and can seep into a structure through dirt floors, cracks in the floors and walls, drains, sumps, pipes, and pores. Radon has been associated with increased risks of developing lung cancer.

The NYSDOH Radon Detector Distribution Program report for November 2021 suggests an average basement radon reading of 4.93 pCi/L for Hamburg. The NYSDOH recommends taking measures to reduce the radon concentration to below 4.0 pCi/L. Although the average radon concentration for the area of the subject property is elevated, radon is not anticipated to pose a concern due to the lack of on-site development. However, such should be taken into consideration as part of any future residential development.

### **8.5 Wetlands**

The approximate distance to the nearest mapped state wetland is 0.9 miles southeast (BU-12).

A federal wetland is located north adjacent (PEM1E).

### **8.6 Lead in Drinking Water**

According to public water analysis conducted by the Erie County Water Authority, the 90<sup>th</sup> percentile for lead for 2022 was 0.009 mg/L. According to the USEPA, the action level of 0.015 mg/L is applicable to municipal potable water supplies and distribution systems.

## 9.0 ACRONYMS/ABBREVIATIONS

State Regulatory Agency is NYSDEC - New York State Department of Environmental Conservation	
<i>A partial list of acronyms is provided below; however, a complete list of acronyms can be found in the regulatory database.</i>	
ACM	Asbestos-Containing Material
AIRS	Aerometric Information Retrieval System
AST	Aboveground Storage Tank
ASTM	American Society for Testing and Materials
BER	Business Environmental Risk
bgs	Below Ground Surface
BTEX	Benzene, Toluene, Ethylbenzene and Xylene
CERCLA	Comprehensive Environmental Response, Compensation and Liability Act
CESQG	Conditionally-Exempt Small Quantity Generator
COC	Contaminant of Concern
CORRACTS	RCRA Corrective Action Site
CREC	Controlled Recognized Environmental Condition
DRO	Diesel Range Organic
ECHO	Enforcement and Compliance History Online
EDR	Environmental Data Resources, Inc.
ERNS	Emergency Response and Notification System
ESA	Environmental Site Assessment
FINDS	Facility Index System
GPR	Ground Penetrating Radar
GRO	Gasoline Range Organic
HREC	Historical Recognized Environmental Condition
ICIS	Integrated Compliance Information System
LBP	Lead-Based Paint
LCS	Lender Consulting Services, Inc.
LQG	Large Quantity Generator
LTANK	Leaking Tank
LUST	Leaking Underground Storage Tank
MTBE	Methyl Tertiary-Butyl Ether
NAICS	North American Industry Classification System
NFA	No Further Action
NFRAP	No Further Remedial Action Planned
NLR	No Longer Regulated
NonGen	Non-Generator
NPDES	National Pollution Discharge Elimination System
NPL	National Priorities List ("Superfund")
PAH	Polycyclic Aromatic Hydrocarbon
PCB	Polychlorinated Biphenyl
PCE	Tetrachloroethylene
PEC	Potential Environmental Concern
PID	Photoionization Detector
RCRA	Resource Conservation and Recovery Act
REC	Recognized Environmental Condition
RGA	Recovered Government Archive
SEMS	Superfund Enterprise Management System
SHWS	State Hazardous Waste Site
SQG	Small Quantity Generator
SVOC	Semi-Volatile Organic Compound
TCE	Trichloroethylene
TPH	Total Petroleum Hydrocarbon
TSDF	Treatment, Storage and Disposal Facility
USEPA	United States Environmental Protection Agency
UST	Underground Storage Tank
VCP	Voluntary Cleanup Program
VEC	Vapor Encroachment Condition
VOC	Volatile Organic Compound
VSQG	Very Small Quantity Generator
<b>UNITS</b>	
mg/kg	Milligrams per kilogram
ppb or ppm	Parts per billion or Parts per million
µg/l	Micrograms per liter

## 10.0 LIMITATIONS OF THE REPORT

We have prepared this report for the exclusive use of Mission Hills Development Corp.. LCS' liability is limited to use by this client for a period of one year. Use by any other party is strictly prohibited except by authorization in writing from this consultant. LCS accepts no liability for others' use of this report.

This Phase I Environmental Site Assessment is based on the [Scope of Work](#) contained within this report. This report is not to be considered as an environmental audit of the subject property or a complete environmental investigation of the subject property. The purpose of this assessment is not to proclaim a property is devoid of environmental impact but rather to identify recognized environmental conditions as defined in [Section 2.0](#).

This assessment (as defined by ASTM) is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with the subject property. No sampling or analyses of materials, including soil, water, air, building materials, etc., were obtained as part of this assessment unless otherwise noted. LCS neither accepts, assumes nor warrants responsibility for the nature or toxicity of such substances. LCS was not requested to complete surveys for mold, asbestos, or lead-based paint; as such, materials identified through the cursory inspection should be considered a partial list of materials that may exist.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property. Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues.

To the best of LCS' knowledge, the information contained in this report is true and accurate. LCS' personnel exercised due diligence when gathering the information and used practices common to environmental professionals engaged in similar environmental investigations. LCS makes no guarantees regarding the accuracy of information gained from other sources. LCS neither implies, warrants, guarantees nor accepts liability relative to the environmental conditions at the subject property regarding the following:

1. Site specific practices and/or disposal methods of the past or future owners.
2. The presence of asbestos, lead-containing materials, or radon and/or the environmental impact of such substances on the subject property or building(s) and structure(s) on the subject property other than those observed during the site reconnaissance and documented within the report.
3. Adjacent property owners, their environmental practices, and/or impact of such properties and practices on the subject property other than those identified within the database reports and/or observed by those performing the site inspection of the subject property.
4. Unreported spills.
5. Practices, waste disposal, environmental concerns, and/or modifications to waste site indexes after the date of this report.
6. Groundwater or soil quality on the subject property.
7. Accuracy or completeness of information supplied to LCS by others.
8. Environmental conditions in areas that were not accessible or not otherwise shown to LCS (locked rooms, behind walls or ceilings, etc.).
9. Accuracy of previous studies provided to LCS.

This report is also subject to any and all limitations defined within ASTM E1527-21. This includes but is not limited to, the limitation that this report is intended to identify environmental conditions at a specific time. In accordance with ASTM E1527-21, "an environmental site assessment meeting or exceeding this practice is presumed to be viable when it is conducted within 180 days prior to the date of acquisition of the subject property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction)" and may be updated within one year. The following critical dates should be understood by the User:

Component	Completion Date
Interviews	October 5, 2023
Government Records Review	October 6, 2023
Site Reconnaissance	October 12, 2023
Environmental Professional Declaration	October 19, 2023
Lien Search	Responsibility of the User

The principles defined within ASTM E1527-21 and followed within this study include the following:

1. This practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with a property.
2. All appropriate inquiry does not mean an exhaustive assessment of a clean property. One of the purposes of this practice is to identify a balance between limiting costs/time and the reduction of uncertainty about unknown conditions.
3. The level of inquiry is variable and depends on the type of property, risk level of the User and information developed in the course of the inquiry.
4. Subsequent environmental assessments should not be used as standards to evaluate the appropriateness of prior inquiries based on hindsight, new information or new techniques.

LCS was not requested to complete surveys for ACM, LBP, or mold. As such, materials identified through the cursory inspection should be considered a partial list of materials which may exist. It should be understood that asbestos can be found in several types of building materials regardless of the age of the subject structure(s). In addition, the cursory LBP review did not include identification of suspect LBP dust associated with windows, doors, etc. In any event, caution is recommended in the event building materials are to be disturbed; state and federal regulations may require a survey and/or notifications prior to disturbance, as well as proper handling and disposal of confirmed ACM and LBP. Worker safety should be considered during any future site renovations or demolition. Furthermore, mold can grow in hidden areas not observed during LCS' site reconnaissance. Areas that experience water damage and areas of high humidity are of particular concern. Caution should be taken following any future water releases within the subject structure(s).

This report was prepared using data, information, and references available from federal, state, and local governmental agencies and information supplied by knowledgeable parties, relying in large part on owner or occupant interviews. LCS neither assumes nor accepts any liability for the completeness or accuracy of information gained from these sources or for any misstatements or misrepresentation of facts from parties interviewed during this process.

Observations made at the time of the site reconnaissance are contained herein. LCS cannot be held responsible for omissions as a result of any changes made to the subject property after the date of the site investigation.

Discussions regarding adjacent and/or nearby properties is based on information supplied to LCS and LCS' observations of nearby properties at the time of the site reconnaissance. Any property can be affected by various sources of point and non-point source pollution. The number of reported spills and complaints in the vicinity of the subject property may be an indicator of point source pollution in the area. Non-point sources are common in rural areas (such as runoff from agricultural fields). Further study would be required to positively confirm whether the subject property has been impacted by nearby properties.

**Areas of the subject property where access was limited, obstructed, or denied are mentioned herein and LCS renders no opinion as to the presence or absence of potential concerns, hazardous materials, or potential environmental liability due to these limitations. According to ASTM, asphalt pavement is considered a limitation.**

## **11.0 USER PROTECTIONS/RESPONSIBILITIES**

Persons claiming the liability protections under CERCLA must meet the statutory requirements of one of the following landowner liability protections. [It should be noted that the user must also satisfy certain continuing obligations outside the scope of this Phase I Environmental Assessment, as required by CERCLA].

- The innocent landowner defense pursuant to CERCLA Sections 9601(35) and 9607(b)(3).
- The bona fide prospective purchaser liability protection pursuant to CERCLA Sections 101(40) and 9607(r).
- The contiguous property owner liability protection pursuant to CERCLA Section 9607(q).

The following information is the responsibility of the user and not of the environmental professional. This information may be provided by the user to the environmental professional for use in the final opinion of the all appropriate inquiry. If the information is not provided by the user, the Environmental Professional's ability to render such an opinion may be hindered and identified as a data gap.

- Searches for environmental cleanup liens and activity and use limitations against the subject property that are filed or recorded under any federal, tribal, state or local law, as required by 40 CFR section 312.25 and 312.26.
- Assessments of any specialized knowledge or experience on the part of the landowner, as required by 40 CFR section 312.28.
- An assessment of the relationship of the purchase price to the fair market value of the subject property, if the property was not contaminated, as required by 40 CFR 312.29.
- An assessment of commonly known or reasonably ascertainable information about the subject property, as required by 40 CFR section 312.30.
- The degree of obviousness of the presence or likely presence of releases or threatened releases at the property, and the ability to detect the releases by appropriate investigations, as required by 40 CFR section 312.31.

In addition, there are other requirements within 40 CFR 312 of the user post-purchase regarding maintaining use limitations, providing access for studies from off-site sources, and other matters. The user should review these requirements, which depend on the specific liability protection that may apply to the use.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by LCS, Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

*The Sanborn Library LLC Since 1866™*

## Limited Permission To Make Copies

LCS, Inc (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

### RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

### RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR MGP..... EDR Proprietary Manufactured Gas Plants

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

## EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### *Lists of state and tribal leaking storage tanks*

LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the LTANKS list, as provided by EDR, and dated 05/05/2023 has revealed that there are 7 LTANKS sites within approximately 0.5 miles of the target property.

### ADDITIONAL ENVIRONMENTAL RECORDS

#### ***Records of Emergency Release Reports***

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 05/05/2023 has revealed that there are 33 NY Spills sites within approximately 0.5 miles of the target property.

### ***Other Ascertainable Records***

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 07/05/2023 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

Spiller Address: 702 SOUTHWEST 8TH STREET  
Spiller Company: 001  
Contact Name: Not reported  
DEC Memo: "Prior to Sept, 2004 data translation this spill Lead\_DEC Field was FG  
06/01/00: FG SITE INSPECTION  
AT WAL MART OIL CHANGE. SPOKE TO THE MANAGER OF THAT DEPARTMENT. HE  
SAID THAT THE SEWER BACKED UP  
AND YESTERDAY THE FLOOR WAS WASHED DOWN AND IT WOULDN'T FLOW THROUGH  
THE SANITARY DUE TO THE  
BACKUP. WHILE I WAS THERE, THE SUMP PUMP IN THE BASEMENT WAS PUMPING  
THE WATER FROM THE BASEMENT  
(MECHANIC'S PIT) TO THE PARKING LOT IN THE BACK WHICH LED TO A STORM  
DRAIN AND DISCHARGED TO THE  
CREEK BEHIND THE STORE. THE STAINING WAS OBVIOUS AND THE OIL & VEHICLE  
FLUIDS WERE EVIDENT AT THE  
DISCHARGE TO THE CREEK. THE MANAGER SAID THAT THIS HAS BEEN ONGOING  
SINCE 3:00 PM WEDNESDAY. THEY  
SAID THEY CALLED BISON, SAFETY KLEEN AND ANOTHER COMPANY TO PUMP THIS  
MATERIAL OUT BUT THEY  
WOULDN'T TAKE IT DUE TO THE MIXTURE OF FLUIDS. THEY WERE WAITING FOR  
THEIR CORPORATE CLEAN UP  
PEOPLE WHO WOULDN'T ARRIVE UNTIL FRIDAY. THEY HADN'T GOTTEN THE SEWER  
REPAIRED BECAUSE THEY GOT AN  
ESTIMATE FROM THE DRAIN DOCTOR FOR \$5000 AND THAT WAS TOO EXPENSIVE.  
BOB CAMP, THE DISTRICT MANAGER  
FROM SPRINGVILLE, WAS EXPECTED TO ARRIVE IN 1/2 HOUR AND HE WOULD  
DISCUSS THIS PROBLEM BECAUSE HE  
IS RESPONSIBLE. IN THE MEANTIME, THE DEPT MGR UNPLUGGED THE BASEMENT  
SUMP PUMP THAT WAS DISCHARGING  
WATER TO THE BACK PARKING LOT. I TOLD HIM THAT HE SHOULD HAVE REPORTED  
THIS SPILL TO THE HOTLINE  
AND GAVE HIM THE NUMBER. BOB CAMP ARRIVED ON SITE AND I SHOWED HIM THE  
DISCHARGE AT THE CREEK. I  
SHOWED HIM THE STAINING ON THE PARKING LOT AND THAT I WITNESSED THE  
SUMP PUMP DISCHARGING TO THE  
BACK PARKING LOT AND THAT THE BASEMENT AREA HAD OIL & FLUIDS & WATER

WAL-MART (Continued)

S104653282

ALL OVER IT. HE SAID THAT THEY WERE WAITING FOR THEIR CORPORATE CLEANUP PEOPLE TO COME OUT & THE WOULDN'T BE OUT UNTIL FRIDAY OR SATURDAY. I TOLD MR. CAMP THAT THIS WAS NOT ACCEPTABLE. I TOLD HIM THAT HE SHOULD HAVE REPORTED THIS SPILL TO THE NYSDEC AND GAVE HIM THE NUMBER. I TOLD HIM THAT THE DISCHARGE OUT OF THE BACK WAS ILLEGAL AND NEEDED TO BE CLEANED UP RIGHT AWAY. I TOLD HIM THAT HIS PLUMBING PROBLEM SHOULD BE REPAIRED RIGHT AWAY AND THAT THE BUILDING SPILL SHOULD BE CLEANED UP RIGHT AWAY. MR. CAMP AGREED TO CLEAN UP THE SPILL IN THE BUILDING AND AT THE CREEK AND IN THE PARKING LOT. HE SAID HE WILL HAVE THE PLUMBING REPAIRED BY FRIDAY MORNING. I TOLD HIM I WILL BE BACK TO CHECK FRIDAY AFTERNOON.

06/02/00: FG TELECON TO MARK FITZGERALD WITH THE SOUTHTOWNS SEWAGE TREATMENT PLANT. HE SAID HE WILL HAVE AN INSPECTOR AT WALMART TO CHECK ON THEIR DISCHARGE DUE TO THE FACT THAT THERE WAS QUITE A BIT OF OIL AND FLUIDS IN THE BUILDING AND THAT THEY HAVE THEIR SEPARATOR PUMPED ONLY EVERY SIX MONTHS.

06/02/00: FG GAVE A COPY OF THE SPILL REPORT TO LAW ENFORCEMENT.

06/02/00: FG & ECO JIM HUNT MET ON SITE WITH BARNEY HEWITT (WALMART TIRE & LUBE MANAGER). IT WAS RAINING HEAVILY AND A SHEEN WAS EVIDENT AT THE CREEK. WE PLACED TWO ADDITIONAL BOOM ACROSS THE CREEK. MR. HEWITT STATED THAT THEY DID DISCHARGE FROM THE SUMP TO THE PARKING LOT. HE SAID THAT THEIR CORPORATE CLEANUP COMPANY WILL BE ON SITE LATER TODAY AND THEY WILL COMPLETE THE CLEANUP INSIDE. HE WILL GET A DISPOSAL RECEIPT FOR THE WORK. ECO HUNT CONTINUED TO DISCUSS THE ILLEGAL DISCHARGE OF THIS MATERIAL FROM THEIR BASEMENT AND A FINE. MR. HEWITT SAID THAT BOB KLOSKO WITH THE SOUTHTOWNS SEWAGE TREATMENT PLANT WAS ON SITE EARLIER TODAY.

06/05/00: FG SITE INSPECTION. ECO JIM HUNT ON SITE. HYDRA VAC WAS ON SITE ON FRIDAY AFTERNOON AND LOOKED AT THE PUMP AND VACCED OUT THE SEPARATOR BECAUSE IT WAS PLUGGED. THERE WAS NO LONGER A SHEEN IN THE CREEK. THE BOOM AND PADS HAD NOT BEEN REMOVED. THE PUMP WAS NOT REPAIRED AND THE PIT AREA WAS NOT CLEANED UP. I TOLD RON, THE ASST MGR, THAT THIS SHOULD HAVE BEEN CLEANED UP AND HE SAID THAT HE WOULD COMPLETE IT. I TOLD HIM I WOULD BE BACK TOMORROW. I WAS TOLD THAT THE SEPARATOR AND SUMP NEVER GET CLEANED OUT. I WAS ALSO TOLD THAT THIS BACK UP WAS A PROBLEM FOR A COUPLE MONTHS.

06/06/00: FG SITE INSPECTION. SPOKE TO BARNEY HEWITT. HE GAVE ME THE DISPOSAL RECEIPT FROM HYDRA VAC FOR THE SEPARATOR MATERIAL/SLUDGES. THE PIT AREA WAS CLEANED OUT BUT THE SUMP PUMP HADN'T BEEN FIXED YET. THEY WILL PICK UP THE BOOM AND PADS. I TOLD THEM THAT THEY NEED TO REGISTER THE WASTE OIL TANKS, WHICH THEY HAVE TWO.

06/22/00: FG SITE INSPECTION. BOOMS AND PADS PICKED UP FROM DITCH. WASTE OIL TANK HAS NOT BEEN REGISTERED YET.

08/16/00: WAL MART REGISTERED

FREE PRODUCT NOTICED IN EXCAVATION. 05/05/88: MF SITE VISIT/DAVID MENDEL (EOI) CONTAMINATED SOIL BEING REMOVED, FREE PRODUCT ON GROUNDWATER BEING PADDED. PAD TO BE LEFT IN PLACE OVERNITE. 05/06/88: MF SITE VISIT/DAVID (E.O.I.). TOLD HIM TO PLACE PADS ON GROUNDWATER. AREA TO BE BACKFILLED MONDAY (5/9/88). ALSO TOLD HIM WHERE I WANTED M.W. & HOW I WANTED IT DRILLED. 05/12/88: MF SITE VISIT/JIM CREIG & JIM BARRON(BUFFALO DRILLING), THE WRONG DRILL BITS WERE BROUGHT FOR A 4 M.W., AFTER DRILLING STARTED I STOPPED IT BECAUSE OF PROXIMINITY TO UNDERGROUND H.V. LINE. 06/10/88: MF SITE VISIT/ED OCONNOR, I EXPLAINED TO HIM WHAT HAS TO BE DONE TO DISPOSE OF HAZ WASTE. GARY IS ON VACATION. 06/13/88: MF SITE VISIT/GARY GHOSEN, I EXPLAINED TO HIM WHAT HAS TO BE DONE TO DISPOSE OF HAZ. WASTE & THAT I WILL ASSIST HIM. I INSPECTED EXCAVATION, NO PRODUCT/SHEEN NOTICED ON GROUNDWATER. 06/15/88: MF TELECON E.P.A., HAD EPA ID FORM SENT TO GARY GHOSEN. 06/28/88: MF RECEIVED FIRST PAY PACKAGE FROM E.O.C. 08/24/88: MF SITE VISIT, CHECKED M.W. NO PRODUCT/SHEEN/ODOR. MET WITH GARY GHOSEN, HE STILL DOESN'T HAVE AN EPA ID#. 09/13/88: MF GARY GHOSEN TELECON, HE HAS EPA ID# & WANTS BARREL OF HAZ WASTE DISPOSED OF. TELECON E.O.I. & INFORMED DAVE OF THIS, HE WILL SET UP DISPOSAL. 01/31/89: MF SITE VISIT TO CHECK MW. UNABLE TO GET CAP OFF (DENTED). LEFT MESSAGE FOR GARY GHOSEN TO CALL ME. 03/09/89: MF SITE VISIT, CHECKED MW. NO PRODUCT/SHEEN/ODOR, LIQUID CLEAR. 04/10/89: MF SITE VISIT, CHECKED MW, NO PRODUCT/SHEEN/ODOR, LIQUID CLEAR. 05/22/89: MF SITE VISIT, CHECKED MW, NO PRODUCT/SHEEN/ODOR. 05/22/89: MF SITE VISIT, CHECKED MW., NO PRODUCT/SHEEN, LIQUID CLEAR. 07/31/89: MF SITE VISIT, CHECKED MW, NO PRODUCT/SHEEN/ODOR, LIQUID CLEAR. MW CHECKED 5X. ALL BILLS IN AND SENT TO ALBANY. NO FUTHER ACTION NECESSARY BY SPILLS. "FUEL OIL TANK COULD NOT MAINTAIN PRODUCT FOR TANK TEST"

SOIL AND UNCOVERED TWO UST'S IN THE NYSDOT ROW NEAR SOUTHWESTERN. UNION CONCRETE THE PRIME FOR THE NYSDOT STAGED CONTAMINATED SOIL ON SITE. THE ENVIRONMENTAL SUB - ENSOL - KATIE HOELSCHER WAS ON SITE. SHE MONITORED THE EXCAVATION USING A PID AND COLLECTED SOIL SAMPLES IN THE EXCAVATIONS. UNION CONCRETE/ENSOL WILL REMOVE AND DISPOSE OF THE WATERS FROM THE THREE TANKS FOUND. THEY WILL ALSO REMOVE, CLEANOUT AND DISPOSE OF THE UST'S. A REPORT WILL BE PROVIDED OF THEIR FINDINGS. 3/24/09 NYSDOT, MIKE SMITH, LISA BEVILACQUA AND JANINE SHEPHERD NOTIFIED FG THAT THEY WILL NOT DO ANY FURTHER SITE REMEDIAL WORK. THEY WANT DEC TO PROVIDE A CONTRACTOR TO COMPLETE THE REMAINING CLEANUP OF SOILS ASSOCIATED WITH THE UST'S DISCOVERED ON SITE. FG NOTIFIED MS JANINE SHEPHERD THAT THE NYSDOT WOULD BE CONSIDERED A RESPONSIBLE PARTY FOR THE SITE AND WOULD BE EXPECTED TO REIMBURSE THE DEC FOR FUNDS EXPENDED. TWO 1000 GALLON METAL UST'S (DISCOVERED ON 3/23/09) AND LINES WERE LOCATED NEAR SOUTHWESTERN IN THE NYSDOT ROW THAT HAD BEEN PURCHASED BY THEM. THE UST FOUND ON 3/19/09 ORIGINALLY AND ANOTHER SMALLER UST - APPROX 100 GALLON IN SIZE WAS LOCATED IN THE TRIANGULAR AREA THAT THE NYSDOT HAS A TEMPORARY EASEMENT ON. THAT PROPERTY IS TO BE GIVEN BACK TO MR. PETER DUCHMAN, FORMER OWNER. FG SITE INSPECTION. WATER/OIL WAS VACUED OUT OF THE 4 UST'S FOUND AND THEY WERE PULLED OUT OF THE GROUND, CUT OPEN AND CLEANED OUT. THE ORIGINAL UST WAS CONCRETE. FG SPOKE TO PETER DUCHMANN WHO OWNS THE ADJACENT ADVANCED AUTO. HE SAID THAT THE PROPERTY WAS A GAS STATION PRIOR TO HIS OWNERSHIP. THE PREVIOUS OWNER REMOVED 5 UST'S BEFORE HE BOUGHT IT IN 1993. MR. DUCHMANN NEVER OPERATED A GASOLINE STATION. JAMES CARMODY WAS THE ORIGINAL OWNER. MR. DUCHMANN SAID THAT HE DOES NOT CURRENTLY OWN THE AREA OF THE TEMPORARY EASEMENT, THE NYSDOT DOES. I TOLD HIM THAT THE DEC CONSIDERS HIM A POTENTIALLY RESPONSIBLE PARTY FOR THE WORK ON SITE AND HE WOULD BE RESPONSIBLE FOR THE COSTS INCURRED BY THE STATE OF NEW YORK FOR THE REMEDIATION OF THE CONTAMINATION DISCOVERED. MR. DUCHMANN SAID STEVE ADAMS WITH THE NYSDOT REAL ESTATE GROUP SPOKE TO HIM ABOUT THE TERMS OF THE TEMPORARY EASEMENT AND HE UNDERSTANDS THAT THE NYSDOT OWNS IT. MR. DUCHMANN CALLED MR. ADAMS AND TOLD HIM TO CALL FG. MR. DUCHMANN SAID THAT THE NYSDOT DID A SURVEY OF THE PROPERTY LOOKING FOR UST'S IN 2004 AND THEY ALSO DID SOIL BORINGS. MR. DUCHMANN SAID HE WOULD NEED TO TALK WITH HIS ATTORNEY ABOUT THIS. MR. DUCHMANN CALLED FG LATER IN THE DAY INDICATING THAT HIS ATTORNEY, MIKE WOLFGANG 855-0600 TOLD HIM TO GIVE ACCESS BUT ALSO SAID HE DOES NOT ACCEPT ANY LIABILITY FOR THIS SPILL AND WILL NOT PAY FOR ANYTHING. SO, MR. DUCHMANN GAVE THE DEPARTMENT ACCESS TO COMPLETE THE SITE WORK. FG HIRED

OP TECH TO REMEDIATE THE SITE. KEVIN CANNON COORDINATED THE JOB. DECATUR HEWITT AND TWO LABORERS WERE ON SITE COMPLETING THE EXCAVATION WORK. THEY HAD A 135 HERTZ EXCAVATOR, A 10 WHEELER DUMP TRUCK AND A PID ALONG WITH FENCING MATERIAL AND PLASTIC FOR THE REMEDIATION WORK. THEY EXCAVATED CONTAMINATED SOIL IN THE AREA OF THE FORMER 1000 GALLON UST'S ALONG SOUTHWESTERN AND STAGED THE SOILS ON THE CLOSED PORTION OF ROUTE 20A, THE AREA THAT UNION CONCRETE GAVE US TO STAGE THE SOIL. UNION CONCRETE SAID THEY WOULD BACKFILL ANY EXCAVATION AND NEEDED THE WORK DONE ASAP AS ROAD CONSTRUCTION NEEDED TO CONTINUE THE NEXT DAY WITH A STORM SEWER PLACEMENT NECESSARY IN THE AREA OF THE CONTAMINATION. OP TECH COLLECTED A WEST AND NORTH WALL EXCAVATION SAMPLE. UNION CONCRETE AND THE NYSDOT SAID THEY WOULD REMEDIATE THE SURFICIAL SOIL TO APPROX 2 FT DEPTH CONTAMINATION SITEWIDE AS THEY NEED TO BRING THE ROAD TO A SPECIFIC LEVEL. THEY SAID THEY WOULD ALSO REMOVE ALL PIPING.

3/25/09 FG SITE INSPECTION. KEVIN CANNON WITH OP TECH ON SITE. HE COLLECTED SOIL SAMPLES FROM THE SOIL PILE AND THE EAST AND BOTTOM OF THE UST EXCAVATION. FG AND MR. CANNON AGREED THAT EXCAVATION WORK WOULD CONTINUE NEXT WEEK ONCE WE RECEIVE DISPOSAL APPROVAL (TO DIG AND HAUL THE REMAINING CONTAMINATION AND TO LOAD OUT THE STAGED SOILS) AND ENSOL REMOVES THE PLASTIC WATER TANK FULL OF UST WATER. THE EXCAVATION WILL CONTINUE IN THE TEMPORARY EASEMENT TRIANGULAR AREA. NYSDOT AND UNION CONCRETE WAS NOTIFIED OF THE SCHEDULE. 4/6/09 OP TECH ON SITE - KEVIN CANNON AND TWO WORKERS. EQUIPMENT NOT ON SITE YET. WORK TO START HAULING SOIL TO THE MODERN LANDFILL. 04/10/09 JFO ON SITE FOR FG MET WITH LINDA FROM OP-TECH. THEY EXCAVATED AN AREA WITH VERY STRONG GASOLINE ODORS. THE NEIGHBORS AND THE LANDFILL ARE COMPLAINING. KEVIN CANNON STOPPED THE HAULING OF THE SOIL AND WILL RESAMPLE. OP-TECH IS STAGING THE SOIL ON PLASTIC UNTIL THEY GET THE RESULTS. 4/30/09 RECD THE ANALYTICAL RESULTS FOR TWO SOIL SAMPLES 2009-088-#7 8270 TOTAL 14100 PPB, 8260 TOTAL 12.7 PPB SOUTHEAST WALL, SAMPLE 2009-088-#14 8270 TOTAL ND, 8260 TOTAL 930 PPB.

5/11/09 RECD THE ANALYTICAL RESULTS FOR THE DISPOSAL SAMPLING COMPLETED. THE RESULTS SHOW THE SOIL TO BE NON HAZARDOUS 7 EXCAVATION SAMPLES WERE COLLECTED AND THE RESULTS WERE ALL BELOW TAGM 4046 LEVELS. A DOH 310-13 RESULT SHOWED THAT GASOLINE WAS PRESENT AT 33000 PPM. 8/3/09 OP TECH SUBMITTED A SOIL EXCAVATION SUMMARY REPORT FOR THE WORK THEY COMPLETED FOR THE DEPARTMENT. THEY REMOVED AND DISPOSED OF 1479 TONS OF PETROLEUM IMPACTED SOIL AT MODERN LANDFILL. OP TECH DID NOT REMOVE ANY UST'S - THE NYSDOT CONTRACTOR REMOVED THE UST'S. OP TECH SUBMITTED THE DISPOSAL RECEIPTS FOR THE SOIL DISPOSED. 1/7/09 THE NYSDOT SUBMITTED A 9/18/09 LETTER INCLUDING ANALYTICAL RESULTS AND

DISPOSAL RECEIPTS HOWEVER, A MAP WAS NOT INCLUDED. JANINE SHEPHERD NOTIFIED THE DEPT THAT SHE IS TRYING TO GET THE MAP FROM ENSOL - THE ENVIRONMENTAL SUB FOR UNION CONCRETE - AND WILL PROVIDE IT AS SOON AS SHE GETS IT.  
6/17/10 FG SUBMITTED A REQUEST TO MS SHEPARD TO PROVIDE THE SAMPLE LOCATION MAP SO THAT THE DEPT CAN CLOSE THE SITE. 9/24/10 THE NYSDOT SUBMITTED THE REPORT OF ENSOL'S WORK ON SITE WITH SAMPLING MAPS AND ANALYTICAL RESULTS. THE EXCAVATION RESULTS EXCEED TAGM LEVELS AT THE ROUTE 20/SOUTHWESTERN SIDE OF THE EXCAVATION. BECAUSE OF THIS, THE SITE IS INACTIVE. NO FURTHER WORK IS REQUIRED BY THE DEPARTMENT."

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

LINE PROJECT ALONG MCKINLEY PARKWAY IN FRONT OF CITY MATTRESS. DOT WILL LEAVE EXCAVATION OPEN UNTIL WEEK OF 13TH WHEN EMPIRE WILL BEGIN EXCAVATION WORK. ANY FURTHER CONT. FOUND ON DOT DIG WILL BE STOCKPILE ON EXSISTING PILE OF CONTAMINATED SOIL FROM THE PROJECT NEAR AUTO ZONE ACROSS STREET. THIS WILL BE DISPOSED WITH THE DISPOSAL INFO FOR THE BIGGER DOT PROJECT. 04/20/09 TDJ RECEIVED SUBCONTRACTOR BID SHEETS FROM DAVE STEINER FOR DISPOSAL OF SOIL AND FILL MATERIAL FOR BLACTOP AREA. WORK TO BEGIN ON 4/23/09. CONTACTED BENDERSON TO INFORM OF OUR TENTATIVE START DATE. 04/23/09 TDJ SJB EMPIRE DROPPED EXCAVATOR AT SITE AND JAKE METZGER AND I DISCUSSED AREAS TO BE EXCAVATED. TRUCKS FOR REMOVAL WILL BE ONSITE 4/24 AND WORK WILL BEGIN ON MCKINNLEY ROAD SIDE. BENDERSON AND UNION CONCRETE WERE NOTIFIED OF WORK SCHEDULE. EXCAVATOR SCRAPPED SOIL AND MOVED TREES TO BEGIN EXCAVATION ON 4/24. 04/24/09 TDJ SJB BEGAN EXCAVATION ON MCKINNLEY BLVD SIDE OF PROPERTY. RANDY (EXCAVATOR FOR PROJECT) JAKE (PROJECT SUPER.) FOUND ELECTRIC LINE LEADING TO SIGN. CALLED BENDERSON WHO SEND OUT TEAM AT END OF DAY TO EXAMINE. LINE PUSHED ASIDE FOR DAY. 04/27/09 TDJ SJB DUG UP TO MAIN SIGN/BUSH AREA AT CORNER OF MCKINNLEY AND BIG TREE. RANDY, JAKE AND HELPER. DUG UNDER ELECTRIC LINE AND UP TO CURBING. FILL/STONE PLACED TO LEVEL WHERE NEW CONDUIT WAS REPLACED AND ELECTRIC LINE FINISHED. THIN LAYER OF CONTAMINATED SOIL LEFT UNDER CURBING TO ELIMINATE NEED TO REPLACE CONCRETE WORK. NOT FINISHED TO GRADE ON MCKINNLEY SIDE. 04/28/09 TDJ SJB BEGAN ON BIG TREE SIDE. RANDY, JAKE AND HELPER WORKING. EXCAVATOR BROKE OLD WATER LINE WHICH TERMINATED IN GROUND WITH SHUT OFF VALVE. WATER AUTHORITY WAS CONTACTED AND FOUND FEED LINE ACROSS BIG TREE TO SHUT DOWN. 04/29/09 TDJ SJB DUG BIG TREE SIDE IN DIRT. RANDY, JAKE, HELPER. DUG OUT TO 6' FROM EC SEWER LINE AT BIG TREE ROAD. SOME LEVELS OF CONT. LEFT NEAR SEWER LINE. DUG TO EDGE OF CURBING ON PARKING LOT SIDE. FINISHED STONE FILL ON MCKINNLEY SIDE. 04/30/09 TDJ SJB RANDY, JAKE, HELPER. FINISHED SOIL AREA ON BIG TREE SIDE AND BEGAN PARKING LOT ON BIG TREE SIDE. STRONG PETROLEUM ODOR AND SATURATED SOIL/STONE FOUND UNDER ASPHALT. 05/01/09 TDJ SJB RANDY, JAKE, HELPER. FINISHED DIGGING ALONG CURBING ON BIG TREE SIDE OF PARKING LOT. HOLE LEFT OPEN WITH FENCING AND MARKERS FOR WEEKEND. 05/04/09 TDJ SJB RANDY, STEVE BOHENIK, HELPER WERE ONSITE TO COMPLETE WORK ALONG DRAIN LINE ON BIG TREE SIDE AND TO ACCEPTABLE LIMITS ON MCKINNLEY SIDE OF PARKING LOT. ALL PARKING LOT FILLED WITH STONE TO ASPHALT LINE AND ROLLED FOR COMPACTION. 05/08/09 TDJ SJB/EMPIRE GEO STARTED WORK ON 04/24/09 WITH REMOVAL OF CONTAMINATED SOIL ON THE MCKINNLEY PKWY SIDE OF THE SITE. ELECTRIC LINES IN CONDUIT FOR THE PARK LOT LIGHTS WERE ENCOUNTERED. BENDERSON ONSITE PERSON JOE MONTASANO HAD

THEIR CONTRACTOR COME TO  
DISCONNECT AND RECONNECT LINES EVERY NIGHT UNTIL WE WERE AWAY FROM THE  
WIRE AREA. ON BIG TREE SIDE  
IN GRASS AREA A DEAD END WATER WITH A SHUT OFF VALVE WAS FOUND TO BE  
ACTIVE BY A LEAK CREATED  
DURING MOVEMENT. WATER AUTHORITY WAS CONTACTED AND THEY DUG UP SHUT OF  
VALVE ACROSS BIG TREE ROAD.  
BLACKTOP AREA WAS DUG UP FROM CURBING TO STORM DRAIN LINES NEAR CENTER  
OF DRIVEWAY ON BIG TREE  
SIDE. LOW LEVEL CONTAMINATION WAS LEFT NEAR SEWER TO ALLEVIATE REMOVAL  
AND REPLACEMENT OF LINE AND  
BASIN. CONTINUED BLACKTOP AROUND TO MCKINNLEY SIDE UP TO A POINT OF  
MINIMAL CONTAMINANTS WHERE A  
GEO PROBE HOLE SHOWED LOW LEVELS OF PETROLEUM. STRONG GASOLINE AND  
DIESEL ODORS WERE PRESENT DURING  
THE DIG BUT THE BASE OF EACH EXCAVATION CLEANED UP TO NEAR NON DETECT  
AT BROKEN SHALE LEVEL APPROX.  
8'DEEP. STONE WAS USED TO FILL ALL EXCAVATION AREAS AND DOT AGREED TO  
REPLACE SOIL IN GRASSY AREAS  
DUE TO THEIR ROAD CONSTRUCTION PROJECT ONGOING IN THE SAME AREAS.  
ASPHALT SUBCONTRACTOR WILL BE  
USED TO REPLACED PARKING LOT TO ORIGINAL CONDITION. TREES WERE REMOVED  
AND WILL BE REPLACED BY SJB.  
05/23/09 TDJ RECEIVED BLACKTOP REPLACEMENT BIDS FROM SJB AND WENT WITH  
LOW BID. WORK WILL BE  
PERFORMED ON 06/03/09. 06/03/09 TDJ BLACK TOP WORK BEGAN AND WAS  
COMPLETED TO SATISFACTION OF DEC.  
STRIPPING WAS COMPLETED ON LATER DATE. 11/16/10 TDJ SPOKE WITH DAVID  
STEVER ABOUT 10/27/10 LETTER  
FROM JEREMY FEEDORE (NYAG OFFICE) REGARDING CID GROUP AND SOUTH PARK  
ENTERPRISES QUESTION FOR COST  
RECOVERY. DAVE CALLED JEREMY AND AFTER DISCUSSION THERE WAS NO  
INFORMATION SHOWING CID GROUP  
RUNNING BIG TREE CITGO. 04/06/11 TDJ PROJECT COMPLETE. ONLY PAPERWORK  
NEEDED IS FOR DISPOSAL OF  
SMALL PILE GENERATED BY DOT WHICH HAS NOT BEEN SUBMITTED AFTER  
REPEATED REQUESTS BY DEC. NO FURTHER  
ACTION FILE CLOSED "

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### *Lists of Federal NPL (Superfund) sites*

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: N/A
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 10/03/2023
Number of Days to Update: 18	Next Scheduled EDR Contact: 01/08/2024
	Data Release Frequency: Quarterly

#### NPL Site Boundaries

##### Sources:

EPA's Environmental Photographic Interpretation Center (EPIC)  
Telephone: 202-564-7333

EPA Region 1	EPA Region 6
Telephone 617-918-1143	Telephone: 214-655-6659

EPA Region 3	EPA Region 7
Telephone 215-814-5418	Telephone: 913-551-7247

EPA Region 10	
Telephone 206-553-8665	

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/22/2023	Source: EPA
Date Data Arrived at EDR: 07/06/2023	Telephone: N/A
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 10/03/2023
Number of Days to Update: 18	Next Scheduled EDR Contact: 01/08/2024
	Data Release Frequency: Quarterly

#### NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 10/15/1991

Data Release Frequency: No Update Planned

## ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

## ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 06/23/2023  
Date Data Arrived at EDR: 06/23/2023  
Date Made Active in Reports: 09/20/2023  
Number of Days to Update: 89

Last EDR Contact: 09/26/2023  
Next Scheduled EDR Contact: 01/08/2024  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 06/22/2023

## ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 06/22/2023

## ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 07/24/2023

## ***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 07/24/2023  
Date Data Arrived at EDR: 07/31/2023

## *State and tribal institutional control / engineering control registries*

### ENV RES DECL: Environmental Restrictive Declarations

The Environmental Restrictive Declarations (ERD) listed were recorded in connection with a zoning action against the noted Tax Blocks and Tax Lots, or portion thereof, and are available in the property records on file at the Office of the City Register for Bronx, Kings, New York and Queens counties or at the Richmond County Clerk's office. They contain environmental requirements with respect to hazardous materials, air quality and/or noise in accordance with Section 11-15 of this Resolution.

### RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a 'D' on zoning maps.

**VCP: Voluntary Cleanup Agreements**

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

Date of Government Version: 05/05/2023      Source: Department of Environmental Conservation

Data Release Frequency: Semi-Annually

**ERP: Environmental Restoration Program Listing**

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

## ADDITIONAL ENVIRONMENTAL RECORDS

### *Local Brownfield lists*

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

### HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

## SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g. the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

	Data Release Frequency: Quarterly

## PFAS NPL: Superfund Sites with PFAS Detections Information

EPA's Office of Land and Emergency Management and EPA Regional Offices maintain data describing what is known about site investigations, contamination, and remedial actions under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) where PFAS is present in the environment.

Date of Government Version: 07/05/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/05/2023	Telephone: 703-603-8895
Date Made Active in Reports: 10/02/2023	Last EDR Contact: 10/03/2023
Number of Days to Update: 89	Next Scheduled EDR Contact: 01/15/2024
	Data Release Frequency: Varies

## PFAS FEDERAL SITES: Federal Sites PFAS Information

Several federal entities, such as the federal Superfund program, Department of Defense, National Aeronautics and Space Administration, Department of Transportation, and Department of Energy provided information for sites with known or suspected detections at federal facilities.

Date of Government Version: 07/05/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/05/2023	Telephone: 202-272-0167

Number of Days to Update: 89	Next Scheduled EDR Contact: 01/15/2024
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## PFAS TRIS: List of PFAS Added to the TRI

Section 7321 of the National Defense Authorization Act for Fiscal Year 2020 (NDAA) immediately added certain per- and polyfluoroalkyl substances (PFAS) to the list of chemicals covered by the Toxics Release Inventory (TRI) under Section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA) and provided a framework for additional PFAS to be added to TRI on an annual basis.

Date of Government Version: 07/05/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/05/2023	Telephone: 202-566-0250

Number of Days to Update: 89	Next Scheduled EDR Contact: 01/15/2024
	Data Release Frequency: Varies

## PFAS TSCA: PFAS Manufacture and Imports Information

EPA issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. EPA publishes non-confidential business information (non-CBI) and includes descriptive information about each site, corporate parent, production volume, other manufacturing information, and processing and use information.

Date of Government Version: 07/05/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/05/2023	Telephone: 202-272-0167

	Data Release Frequency: Varies

## PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST\_HANDLING\_INSTR), Non-hazardous waste description (NON\_HAZ\_WASTE\_DESCRIPTION), DOT printed information (DOT\_PRINTED\_INFORMATION), Waste line handling instructions (WASTE\_LINE\_HANDLING\_INSTR), Waste residue comments (WASTE\_RESIDUE\_COMMENTS).

## PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

Date of Government Version: 06/24/2020	Source: Department of Health & Human Services
Date Data Arrived at EDR: 03/17/2021	Telephone: 202-741-5770

Number of Days to Update: 601	Next Scheduled EDR Contact: 11/06/2023
	Data Release Frequency: Varies

## PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

Date of Government Version: 07/05/2023

## PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

Date of Government Version: 07/05/2023

## PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset, as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

## PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

## AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

## PFAS 3: PFAS Environmental Site Remediation List

Per- and Polyfluoroalkyl Substances (PFAS) are a group of chemicals used to make fluoropolymer coatings and products that resist heat, oil, stains, grease, and water. Fluoropolymer coatings are blends of resins and lubricants used in products such as water-repellent clothing, furniture, adhesives, paint and varnish, food packaging, heat-resistant non-stick cooking surfaces and insulation of electrical wires. Chemicals in this group include perfluorooctanoic acid (PFOA) and perfluorooctane sulfonic acid (PFOS).

## HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991  
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

## Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000  
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

## GEOCHECK® - PHYSICAL SETTING SOURCE ADDENDUM

### TARGET PROPERTY ADDRESS

4825 BIG TREE ROAD  
4825 BIG TREE ROAD  
HAMBURG, NY 14075

### TARGET PROPERTY COORDINATES

Latitude (North):	42.76591 - 42° 45' 57.28"
Longitude (West):	78.802515 - 78° 48' 9.05"
Universal Tranverse Mercator:	Zone 17
UTM X (Meters):	679800.4
UTM Y (Meters):	4736947.0
Elevation:	733 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map:	14122106 BUFFALO SE, NY
Version Date:	2019
South Map:	14122146 HAMBURG, NY
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

### TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### **TARGET PROPERTY TOPOGRAPHY**

General Topographic Gradient: General West

#### **SURROUNDING TOPOGRAPHY: ELEVATION PROFILES**

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### **HYDROLOGIC INFORMATION**

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
3602440007D	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
3602440006D	FEMA FIRM Flood data

### **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	NWI Electronic
BUFFALO SE	Data Coverage YES - refer to the Overview Map and Detail Map

### **HYDROGEOLOGIC INFORMATION**

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Status:	Not found

### **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### ROCK STRATIGRAPHIC UNIT

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

#### Soil Map ID: 1

Soil Component Name: Niagara  
 Soil Surface Texture: silt loam  
 Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.  
 Soil Drainage Class: Somewhat poorly drained  
 Hydric Status: Not hydric  
 Corrosion Potential - Uncoated Steel: High  
 Depth to Bedrock Min: > 0 inches  
 Depth to Watertable Min: > 31 inches

Soil Layer Information								
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)	
	Upper	Lower		AASHTO Group	Unified Soil			
1	0 inches	12 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 6.6	
2	12 inches	25 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 6.6	

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information								
	Boundary			Classification			Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil			
3	25 inches	40 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 6.6	
4	40 inches	59 inches	channery silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 6.6	

### Soil Map ID: 2

Soil Component Name: Illion

Soil Surface Texture: silty clay loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 15 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information								
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil			
1	9 inches	12 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4	
2	0 inches	9 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4	
3	12 inches	29 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4	
4	29 inches	59 inches	channery silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4	

### Soil Map ID: 3

Soil Component Name:	Darien
Soil Surface Texture:	silt loam
Hydrologic Group:	Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.
Soil Drainage Class:	Somewhat poorly drained
Hydric Status:	Not hydric
Corrosion Potential - Uncoated Steel:	High
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 23 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

3	33 inches	59 inches	channery silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4	

### Soil Map ID: 4

Soil Component Name: Darien

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 23 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

## HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

New York Public Water Wells

Source: New York Department of Health

Telephone: 518-458-6731

## OTHER STATE DATABASE INFORMATION

Oil and Gas Well Database

Source: Department of Environmental Conservation

Telephone: 518-402-8072

These files contain records, in the database, of wells that have been drilled.

### RADON

State Database: NY Radon

Source: Department of Health

Telephone: 518-402-7556

Radon Test Results

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey.

The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of ICAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United States Geological Survey

## PUBLIC RECORDS REQUEST

To: Town of Hamburg  
From: Chelsea Nagel, Analyst  
Date: October 5, 2023  
Re: Public Records Request/FOIA  
LCS Project No. 23.07880.39

LCS, Inc. is completing an Environmental Site Assessment for a property within Town of Hamburg addressed at 4825 Big Tree Road, Hamburg, New York. Tax parcel number(s) 160.20-2-2.1

We are requesting a review of Town of Hamburg files for this property to identify any of the following records, if available:

1. Date the current building was constructed
2. Current and/or previous uses and occupants
3. Building, zoning, and/or fire department permits and/or inspections
4. Environmental enforcement actions, complaints, notices of violations, spills/releases, clean-ups, etc.
5. Underground/aboveground storage tanks or other underground features
6. Use of hazardous materials
7. Old/historical property record cards (prior to electronic records)

If records are found, electronic delivery via email is preferred; otherwise, please contact me to discuss scheduling a file review at your office. Please also contact me in advance if any copy fees apply. **My contact information is as follows: Chelsea Nagel at [cnagel@lenderconsulting.com](mailto:cnagel@lenderconsulting.com) or (716) 982-5528.**

Sincerely,

Chelsea Nagel  
Analyst

**FIRE DEPARTMENT PUBLIC RECORDS REQUEST**

To: Town of Hamburg Fire Department  
From: Chelsea Nagel, Analyst  
Date: October 5, 2023  
Re: Public Records Request/FOIA  
LCS Project No. 23.07880.39

LCS, Inc. is completing an Environmental Site Assessment for a property within Town of Hamburg addressed at 4825 Big Tree Road, Hamburg, New York. We are requesting a review of the fire department files for this property to identify any of the following records, if available:

1. Has your office been informed of any storage of hazardous/regulated materials on the subject property or of any incidents/releases involving hazardous/regulated materials on the subject property in association with Records of Emergency Notification under SARA Title III?
2. Are you aware of any Underground Storage Tanks (USTs) on the subject property (removed or existing)? Has there been any contamination on the subject property due to leaking USTs?
3. Were there any fires on the subject property for which the fire department responded? If so, what type of chemicals were used in the firefighting process?

If records are found, electronic delivery via email is preferred; otherwise, please contact me to discuss scheduling a file review at your office. Please also contact me in advance if any copy fees apply. **My contact information is as follows: Chelsea Nagel at [cnagel@lenderconsulting.com](mailto:cnagel@lenderconsulting.com) or (716) 982-5528.**

Sincerely,

Chelsea Nagel  
Analyst

**HEALTH DEPARTMENT RECORDS REQUEST**

To: Town of Hamburg Health Department  
From: Chelsea Nagel, Analyst  
Date: October 5, 2023  
Re: Public Records Request/FOIA  
LCS Project No. 23.07880.39

LCS, Inc. is performing an Environmental Assessment for a property located within Town of Hamburg addressed at 4825 Big Tree Road, Hamburg, New York. We are requesting that a review of the Health Department files for this property to identify the following records, if available:

1. Septic inspection reports
2. Permits, violations, and/or complaints
3. Spills or uncontrolled releases
4. Underground or aboveground storage tanks
5. Landfilling or dumping

If records are found, electronic delivery via email is preferred; otherwise, please contact me to discuss scheduling a file review at your office. Please also contact me in advance if any copy fees apply. **My contact information is as follows: Chelsea Nagel at [cnagel@lenderconsulting.com](mailto:cnagel@lenderconsulting.com) or (716) 982-5528.**

## STATE ENVIRONMENTAL AGENCY REQUEST

To: NYSDEC - New York State Department of Environmental Conservation  
From: Chelsea Nagel, Analyst  
Date: October 5, 2023  
Re: Public Records Request/FOIA  
LCS Project No. 23.07880.39

LCS, Inc. is performing an Environmental Assessment for a property addressed at 4825 Big Tree Road, Hamburg, New York. We are requesting a review of the state agency files for this property to identify the following records, if available:

1. Environmental enforcement actions, complaints, notices of violations
2. Releases and remediation
3. Land use and deed restrictions
4. Aboveground and underground storage tanks
5. Permits and inspections
6. Hazardous substances and petroleum products

Our research identified site-specific details for the subject property as follows:

Facility ID(s). N/A  
Spill No(s). N/A

If records are found, electronic delivery via email is preferred; otherwise, please contact me to discuss scheduling a file review at your office. Please also contact me in advance if any copy fees apply. **My contact information is as follows: Chelsea Nagel at [cnagel@lenderconsulting.com](mailto:cnagel@lenderconsulting.com) or (716) 982-5528.**

Sincerely,

Chelsea Nagel
